The authors wish to make the following corrections to this paper [1]:

Two dot-plots in the Panel E of Figure 1 (labeled under VAP and VAA) have been inadvertently duplicated during the final preparation of figures. We would like to change the Panel E of Figure 1 in paper [1] to the correct version, as follows:

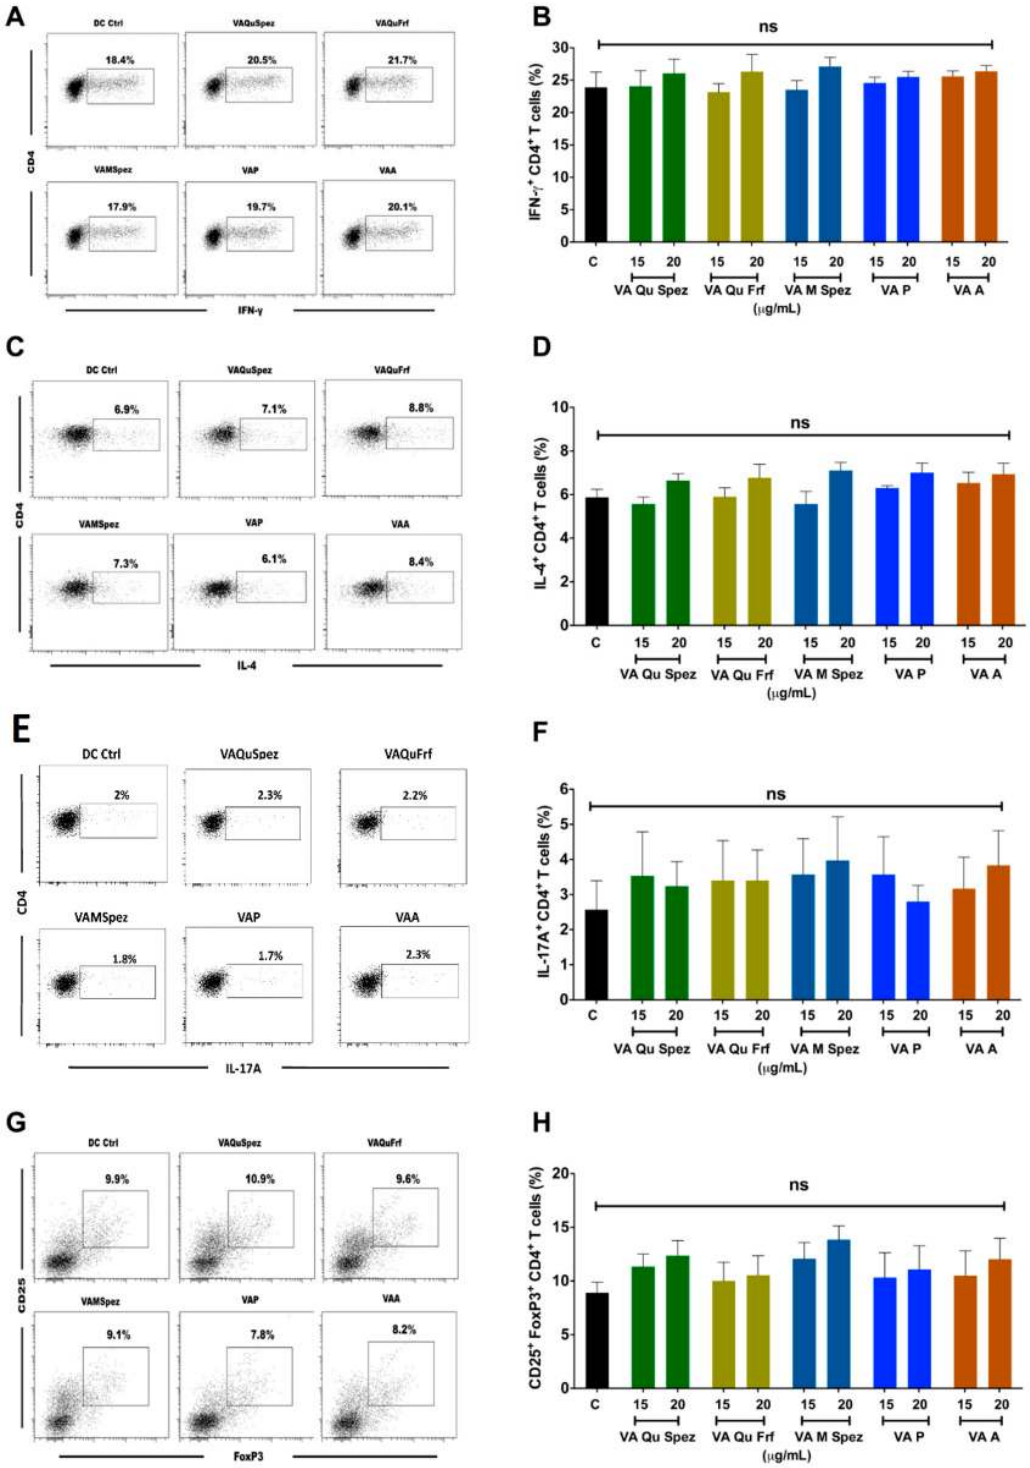

Figure 1. Effect of various VA preparations on the $CD4^+$ T cell responses. DCs were treated with medium alone (DC Ctrl, labelled as 'C') or with five preparations of VA for 48 h. These DCs were co-cultured with $CD4^+$ T cells at 1:10 ratio. After five days of co-culture, the cells were analysed for the various $CD4^+$ T cell subsets by intra-cellular cytokines (IFN-γ, IL-4, IL-17A) or transcription factor (FoxP3) for Th1, Th2, Th17 and Tregs respectively. (**A**,**C**,**E**,**G**) representative dot plots showing the proportion of IFN-γ^+, IL-4^+, IL-$17A^+$ $CD4^+$ T cell and $CD4^+CD25^+Foxp3^+$ T cells respectively; (**B**,**D**,**F**,**H**) Percentage (mean ± SEM, six independent donors) of IFN-γ^+ Th1, IL-4^+ Th2, IL-$17A^+$ Th17 and $CD4^+CD25^+Foxp3^+$ Treg cells respectively. ns, non-significant.

We apologize for this unintentional mistake, which, however, does not affect the results of this manuscript and the conclusions drawn from them.
